

Happy Valley Tomatoes 2013

**All these varieties were selected for taste & success!
(Note: Farm sales only for plants)**

PS: Choose **BUSH*** varieties for Container grown Tomatoes~
...Great harvest, colours & taste on a small plant!

CHERRY TOMATOES...eat these straight from the vine.

1. **Galina Yellow Cherry:** Russian Heirloom STAKE: Vine... Potato leafed plant, produces good harvest mid season that keeps well.
2. **Gardener's Delight:** STAKE: Vine...95 days. Traditional large cherry sized red tomatoes in long trusses with sweet tangy flavour. An English favourite to grow & eat as is!
3. **Red Cherry "Pomodoro":** Italy **BUSH***...50 days. Classic meaty round fruits on vigorous plant. Great early container choice!
4. **Sungold Orange:** STAKE: Vine ...67days. Very rich & juicy tasting fruits on long trusses.
5. **White Cherry:** Heirloom STAKE: Vine...65 days Grape sized treats to pop in your mouth. Palest gold when ripe. Great producer last 2 years running!
6. **Yellow Pear:** Heirloom. STAKE: Vine...65-75 days. Fruit becomes sweeter as they turn golden yellow. Great presentation to simply toss in your salad bowl!

SALAD TOMATOES...not too big or small!

7. **"Flamme":** Organic Heirloom STAKE: Vine... 70days. Firm, smooth, deep orange skinned beauty. Productive, early & great to dry for winter.
8. **Harry's Ukrainian Heritage: SEMI-BUSH*** Optional to stake/cage. Heavy yields of mid-season perfectly round red tomato with a pointy "nipple-like" end. Delicious!
9. **Moneymaker:** Heirloom. STAKE: Vine...95 days Heavy crop of medium sized fruit in clusters. Successful grown in greenhouses or outside, traditional English red salad tomato~ just quarter & serve!
10. **Yellow Perfection:** Heirloom Local seed STAKE: Vine...75 days. Potato leaf variety with 2 inch thin skinned salad sized fruits, very popular in England.
11. **Red Perfection:** Heirloom Local seed STAKE: Vine...75 days. Sister variety to "Yellow Perfection".

PLUM TOMATOES...mama mia!

12. **Roma:** Italy. **BUSH***...75 days. Classic plum tomato for sauces, drying, freezing and eating as is. I must plant more this season!
13. **Golden Rave Plum:** Stake: Vine...70 days Great for greenhouses or grown outside. Pretty shape plus great productivity and flavour!

BEEFSTEAK TOMATOES...WOW!

14. **Bobcat: BUSH***...68 days. Classic Beefsteak and early for its size! Firm uniform fruit up to 10 ounces! Our best big tomato of 2012.

PLUS:

15. **Dwarf Pineapple Cape Gooseberry or Ground Cherry: Bush***... 120 days. You will recognise these individually "packaged" tropical sweet tasting fruits that fall to the ground when ripe in their golden papery husks, commonly used on fancy desserts presentations...Grow like tomatoes with lots of heat & moisture. Ripening in late summer as a last of the season treat! Eat raw or cooked: you can even make jam with them...
16. **True Mexican Tomatillo "Two Colour Fiesta":** Salsa Verde ole! Heirloom seed. (*Physalis philadelphica*) Famously used like tomatoes in savoury Mexican food. Our variety can have traditional green or purple fruits; ripe when the paper cape-like husk splits to reveal the fruit inside!

PS: Here are a couple of my best growing tips for Tomatoes~

- 1) When ever you transplant your baby Tomatoes; to a 5 gallon pot or directly in the ground, always plant them deeper than the original soil line in the smaller pot; this develops a larger root system to grow you larger fruits on a stocky strong plant!
- 2) Tomatoes love the minerals in Epsom salts...sprinkle a teaspoon on the top of the soil of a gallon pot, ¼ cup around plants in the ground. I do this 2 or 3 times during the growing season.
- 3) Regular water, fertilizer & full sun do the rest!
- 4) Do stake your VINE style tomato plants to keep your fruit clean and off the ground from bugs & moulds. Cage vigorous BUSH plants for the same reasons...easy to harvest as well.
